

31st Annual Conference of the
European Association for Computer Graphics

euro graphics 2010 3-7 May Norrköping Sweden

Invitation to Exhibit at Eurographics & Visual Forum

Eurographics 2010 is the 31st annual conference of the European Association for Computer Graphics. The conference will take place in the City of Norrköping in Sweden, home to the Linköping University's (LiU) Campus Norrköping, who will be organizing the conference.

In connection with the conference there will be a 4-day exhibition in the Louis De Geer Conference Centre. The Exhibition is arranged in co-operation with the co-located event **Visual Forum 2010**, which will be held on Monday May 3rd, which will also be the first day of the exhibit. Visual Forum is expected to receive in excess of 400 participants. The Exhibition area is very flexible and conference participants will pass through it on entry to the conference and will mingle in this area during coffee breaks.

Eurographics 2010 attracts participants from around the world, both world-leading academics as well as representatives of major commercial research divisions. We also anticipate a large number of Nordic attendees from related R&D fields. In total we expect approximately **500 registered participants for the conference which will run from the 4th to the 7th May, starting immediately after Visual Forum**. Information on EG2010 is continuously added to the conference web site, which can be found at <http://www.eurographics2010.se/>

Attendees, presenters and invited speakers for the conference will be focussed on the latest developments in all aspects of computer graphics. This concentration of delegates will provide a unique opportunity for you and your company to showcase your products to a large, influential, and discerning audience of academic and industrial participants.

A standard exhibition stand will provide:

- 6 square metres of floor space
- A table and a chair
- Basic electrical supply
- Public wireless connection to internet

Price: € 500

Higher electrical power or network bandwidth requirements can be arranged at a low additional cost. Larger stands can also be accommodated at commensurately higher cost.

The organizing committee is looking forward to your participation in this conference. If you have any queries or comments, please contact me. Any questions, issues and/or requests will be discussed in a confidential manner. A comprehensive and informative exhibit that stimulates exchanges between attendees and exhibitors is a central part of a successful conference. We look forward working with you to achieve this objective.

Yours Sincerely,

Bosse Sundborg, Sponsorships EG2010
